

2025 PREA Annual Report

Overview:

In 2010, the Bureau of Justice Assistance funded the National PREA Resource Center to continue to provide federally funded training and technical assistance to states and localities, as well as to serve as a single-stop resource for leading research and tools for all those in the field working to come into compliance with the federal standards.

According to the National PREA Resource Center, the Prison Rape Elimination Act (PREA) was passed in 2003 with unanimous support from both parties in Congress. The purpose of the act was to “provide for the analysis of the incidence and effects of prison rape in Federal, State, and local institutions and to provide information, resources, recommendations and funding to protect individuals from prison rape.” (Prison Rape Elimination Act, 2003). In addition to creating a mandate for significant research from the Bureau of Justice Statistics and through the National Institute of Justice, funding through the Bureau of Justice Assistance and the National Institute of Corrections supported major efforts in many state correctional, juvenile detention, community corrections, and jail systems.

The act also created the National Prison Rape Elimination Commission and charged it with developing draft standards for the elimination of prison rape. Those standards were published in June 2009, and were turned over to the Department of Justice for review and passage as a final rule. That final rule became effective August 20, 2012.

Mansfield Juvenile Center is committed to providing a safe environment and has a Zero Tolerance Policy regarding sexual abuse, sexual assault or sexual misconduct for the students in our care. To this end, our agency has developed Safe Environmental Standards in accordance with PREA, which have been in place for over 30 years. In 2023 and 2024, this facility continued the implementation of these standards and initiated

further staff training, interactive supervision and quality assurance reviews with the involvement of PREA Compliance Managers.

Mansfield Treatment Center identified blind spots during the course of their site assessment, mirrors were installed and additional cameras were again requested. Additionally, MJTC hired extra part time staff to address coverage for ratio/supervision issues. A Staffing Plan was developed and implemented in relation to video surveillance and supervision practices.

In 2023 and 2024, there were two (2) allegations and zero (0) substantiations.

Given this data and our analysis of our data, the facility will continue to focus on student safety and creating a culture supported by staff training and re-training on boundaries and supervision where sexual abuse and sexual harassment does not occur. In our continuing effort to improve the lives of youth, our agency has embraced the principles associated with PREA and have aligned our Safe Environmental Standards to ensure PREA compliance as well as to improve safety for youth in our programs.

*Note Mansfield Juvenile Treatment Center had one open Investigation at the end of 2022, subsequently the investigation was not closed with a determination until 2023. Mansfield Juvenile Treatment Center Administration has provided all documentation available for the 2022 investigation. Moving forward, MJTC is committed to ensuring full compliance in practice with each PREA standard and making certain all necessary documentation is completed and maintained in order to effectively demonstrate compliance with each provision of each standard.
